WORKSHOP

INTERRELATIONS AND MUTUALLY REINFORCING SYNERGIES BETWEEN EE AND RES

23 APRIL 2018
SCHUMAN 6, BRUSSELS

CONCEPT

The goal of the workshop is to create a common understanding regarding **the complex interplay and possible synergies between the EE and RES** potentials in the contest of a transition towards a low carbon economy, integrating the latest expertise on the matter. On that basis, EU-ASE will be able to define a common and argument-based narrative and subsequently assess strategic partnerships with RES organisations at EU and national level, in a view of setting up a strong and unified coalition of stakeholders willing to push for decarbonization agenda.

The workshop should provide inputs on the following questions:

- (i) **State of play: what is the relation between EE and RES? How do they interact?**
- (ii) **Are there trade-offs between EE and RES?**
- (iii) **How would combined and mutually reinforced policies impact on the EU long term objective to decarbonise the economy?**

About the European Alliance to Save Energy (EU-ASE)

EU-ASE was established in December 2010 by some of Europe's leading multinational companies. The Alliance creates a platform from which our companies (1E, Danfoss, Ingersoll Rand, Kingspan, Knauf Insulation, Philips Lighting, Schneider Electric, Saint-Gobain, Siemens and Veolia) can join with politicians and thought leaders to ensure the voice of energy efficiency is heard from across the business and political community.

EU-ASE members have operations across the 28 Member States of the European Union, employ over 340.000 people in Europe and have an aggregated annual turnover of €115 billion.
